**New York, August 23, 2006** – *Inc.* magazine today announced its 25<sup>th</sup> annual Inc. 500 ranking of the fastest-growing private companies in the country. **The Chicago Based Knowledge Process Management Company, Maxil Technology Solutions Inc,** ranks No. 411 on the list, with three-year growth of 353.5 percent.

Maxil Technology Solutions, a Knowledge Process Management company, provides information technology services and solutions to Fortune 500 companies, small to medium businesses (SMB) and government organizations to help them facilitate their business processes. Maxil has extensive domain knowledge in the insurance, banking, healthcare, financial services and transportation industries. Services are focused on application development, e-Business, resource management and data management.

"We are honored to be recognized by Inc. Magazine as one of the 500 fastest growing private companies in the nation" said Kalyan Reddy Maxil Technology Solutions Inc President.

"The growth required to make a prestigious list like the Inc. 500 for the first time is a clear indicator of Maxil's market leadership and that our long-standing strategy of placing a high priority on domain expertise in various knowledge process based verticals like banking, Insurance and Financial services industries by providing high quality project management and solutions delivery", said Raj Kosaraju CIO for Maxil.

The 2006 Inc. 500, as revealed in the September issue of *Inc.*, reported the most robust bunch of companies the magazine has ever compiled, with aggregate revenue of \$19.7 billion, up from \$16.5 billion last year and \$12.9 billion in 2000. The two largest companies on this year's Inc. 500 are the biggest ever to make the list – No. 170 Western Refining (\$3.4 billion in revenue) and No. 376 Newegg.com (\$1.26 billion) – and the third and fourth companies in Inc. 500 history to crack the billion-dollar mark. In all, 14 companies topped \$200 million in annual revenue, compared with 11 last year.

Most important, the 2006 Inc. 500 companies were engines of job growth, having created more than 90,000 jobs since those companies were founded.

This year's list is the first to include businesses that started up immediately before and after September 11, 2001 – including the No. 1 company and 20 companies in the top 50 – as well as many companies that had to raise capital after the dot-com bubble burst. In total, 104 companies listed on this year's Inc. 500 were started after 2000.

"If you want to find out which companies are going to change the world, look at the Inc. 500," said *Inc.* Editor Jane Berentson. "These are the most innovative, dynamic, fast-growth companies in the nation, the ones coming up with solutions to some of our most intractable ills, creating systems that let us conduct business faster and easier, and manufacturing products we soon discover we can't live without. The Inc. 500 list is *Inc.* magazine's tribute to American business ingenuity and ambition."

### **Hottest Regions for Fastest-Growing Companies**

Federal spending again propels a large number of companies from Washington, D.C., Virginia, and Maryland onto the Inc. 500.

Washington, D.C., is the top metropolitan area for the fourth consecutive year, with 43 of the fastest-growing companies, an increase of one over last year. New York City is a close second and the biggest gainer, adding 17 companies for a total of 42 companies this year, followed by Los Angeles with 25 (down seven companies from last year), Boston with 24 (down three companies), and Atlanta with 20 (no change).

California is the state with the most Inc. 500 companies – 66 (down from 77 last year). Virginia and New York both are home to 34 of the fastest-growing companies,

followed by Texas (32) and Massachusetts (28).

### **The Immigration Debate**

At least 55 of this year's Inc. 500 CEOs were born outside the U.S., coming from countries as far-flung as Argentina, the United Kingdom, India, Russia, Pakistan, and the Philippines. The companies they run employ more than 14,300 workers and contributed more than \$1.36 billion to the economy last year. Other countries may offer cheaper business costs (India, China) or more incentives for entrepreneurs (Ireland, Taiwan), but America still retains its land-of-opportunity glow for these CEOs.

### **Hottest Industries for Fastest-Growing Businesses**

The largest business category among this year's Inc. 500 is IT Services, with 68 companies in this category. Health (36 companies), Retail (35 companies), Real Estate (30 companies), and Human Resources (29 companies) round out the top industries ranked on the 2006 Inc. 500.

### **Top 10 Inc. 500 Companies of 2006:**
